

LYNX Enterprise 5.2.2.3 thru 5.2.2.9 – What's New

Version 5.2.2.3

- Fixed an issue in the Photo Lab form that allowed a user to view a roll if they had rights to Acquire but not rights to View.
- Changed Auto Export to include any new projects in the export list if an administrator checks the "Select All" option when scheduling.
- Changed the Project Select dialog to show "Description" as well as "Name".

Version 5.2.2.4

- Fixed an issue when acquiring photos that caused photos to be recompressed when the "Do not compress" option was selected

Version 5.2.2.5

- Changed the acquire form so that the selection for "Taken By" includes all existing values, even if the user is not an administrator.

Version 5.2.2.6

- Fixed an issue when installing a server or stand-alone application for the first time without installing a project at the same time.

Version 5.2.2.7

- Fixed an issue that caused an "Out of Memory" error when printing a large number of photos.

Version 5.2.2.8

- Fixed an issue that displayed an error message when transferring a packet via FTP, even though the packet was transferred correctly.

LYNX Enterprise 5.2.2.3 thru 5.2.2.9 – What's New

Version 5.2.2.9

- Added a “Show All Rolls” right to the Photo Lab group in the Edit Rights form. Prior to this version, if a user had rights to “View” the Photo Lab, rolls added by all users would be displayed for viewing. With this change, only rolls added by the current user will be displayed unless the user has been given the right to “Show All Rolls”. Administrators continue to see all rolls.
