

- **Secure**
- **Searchable**
- **Simple**

**If a picture is worth a thousand words...then LYNX is worth Millions!**

The LYNX Digital Photo Management Software is designed to handle the toughest project management needs. It creates and manages secure, searchable, high-speed, archived photo database! LYNX is a must for any construction company.

- LYNX works as hard as you do to protect your company, as well as, help your organization stand out as an innovative technology leader in your industry.
- See every project from anywhere in the world at anytime!
- Manage and control your projects like never before!
- **Acquire images from any source! Annotate your images with voice, notes, redline layers, user defined search fields, keywords, redline layers, and more!**
- **Manage your projects effectively by creating visual punchlists, as-builts, and many other project management tools.**
- **Imagine having the ability to see and manage all of your projects across town, or across the world right from your PC!**

Take control of your projects now the quick and easy way! Good visual documentation is the most important form of documentation you can have. It is not subject to interpretation like written documentation. Make better decisions by having reliable secure visual information available immediately. Save time and frustration while making more profit! And best of all when the blame game and finger pointing becomes a problem you will be able to instantly go back in time and "SEE" exactly what occurred and when!
