

LYNXPM

(877) 955-7711 / www.lynxpm.com

Secure, Searchable, Simple!

Thank you for your interest in the LYNX Photo Management Software Program. LYNX is a secure high-speed, searchable, photo management software program. Please visit our website at www.lynxpm.com to see what LYNX can do for you. Is LYNX for you? Answer the questions below to see!

- How much time and money would you save if you could walk every project everyday right from your pc, phone, netbook, mac, or any other device with an internet connection and browser?
- If you could send in 10 minutes the same images that now take 4+ hours freeing up bandwidth, increase productivity, and speed of all your remote applications, what would all that time & productivity be worth?
- Can you email a hyperlink to any sub-contractor and when they click on it, it visually shows them exactly what punch-list items need attention instead of trying to write pages of text, or spend extra time on the phone explaining it?
- Do you find images quickly and easily by using multiple search criteria and date ranges in order to see exactly what occurred where, when, and by whom?
- Are your images protected from being deleted, copied, altered, renamed, etc.?
- Can you link Images to daily field reports, schedule activities, Primavera, Meridian, MS Project, SharePoint, emails, documents, anywhere you can use a hyperlink?

LYNXPM has been dedicated to helping our clients quickly & easily manage their digital photos, use them as a project management tool, and utilize them to protect themselves against costly claim and litigation issues. LYNX does just that it visually “links” you and all your project partners together!

Every contractor takes digital images on every site for many reasons. We have daily walkthroughs, inspections, installation, training, work in progress & completion verification, etc. These images we take are visual documentation, and in many cases can be the determining factor in a litigation situation.

Daily field reports conflict all the time, but images tell a story. We can all see what occurred. There are so many photo management programs available. Only LYNX was designed by contractors for contractors. Only LYNX is designed to document your work. These other photo management systems are great, but they are designed for personal and recreational purposes, holidays, vacations, etc. They are file based systems so images get renamed, copied, deleted, etc., they are designed to edit and modify images not preserve them securely and use them as a project management tool.

There are many different options and configurations for the LYNX Photo Management Software Program. Below are our typical configurations and pricings for you to review.

If you have any questions at all, please feel free to contact me at (877) 955-7711 ext. 83 or via E-mail at Julie@lynxpm.com

Sincerely,

Julie L. Palella
Sales Manager

LYNX CONFIGURATIONS AND PRICING

CORPORATE STANDARD LICENSING:

Master Version: Install on to a server or single PC. The Master Version includes one concurrent user license and unlimited projects. This license is considered your "main warehouse" to administer your digital photos in a single secure, 256 bit encrypted database. Create groups, users, and custom fields, etc. You have complete control over user and group right to determine who has access to which projects & features. The Master Version is needed in conjunction with both the Remote Version and the Lynx Web Application Version. The cost for the Master License is **\$3,450** plus **\$690** for annual toll free support & maintenance. Additional concurrent user licenses may be added to the Master Version for **\$1,200** each plus **\$240** for annual toll free support & maintenance.

Remote Version: Install on to a server or single PC. The Remote Version includes one concurrent user license and unlimited project albums. The Remote Version works just like the Master Version with one exception; it cannot create a project. The Master Version creates the project and has control over the setup of each project. The Master Version then sends the created project to the Remote Version. This saves time and money because all projects are created and controlled by the Master to contain exactly what you want. The Remote along with regularly scheduled packet transfers will keep your Master version updated with the latest jobsite images. The cost for the Remote License is **\$1,850** plus **\$370** for annual toll free support & maintenance. Additional concurrent user licenses may be added to the Remote Version for **\$925** each plus **\$185** for annual toll free support & maintenance.

CORPORATE WEB LICENSING:

Access to your images can be done from anywhere in the world with any web browser or any mobile device with Internet!

LYNX Web Application: Install on to a Web Server. The LYNX Web Application software allows all Lynx Users setup through the Master License (see above) the ability to login, view, search, print, and save images from the Internet at no additional cost beyond the initial purchase price. The Lynx Web Application can also allow authorized users to directly acquire, annotate, and file images into authorized projects over the internet through Authorized Project Licenses and Authorized Web User Licenses. The cost for the Lynx Web Application is **\$5,000** and **\$1,000** for annual toll free support & maintenance. *Included with our purchase you will receive one (1) Authorized Project License and five (5) Authorized Web User Licenses.* Additional Authorized Project Licenses and Authorized Web User Licenses may be added see below for pricing.

Authorized Project License: Allows a project to be "opened" in the Lynx Web Application so authorized web users can project directly through the Internet or by the use of the Quick Web Acquire Tool. The cost for an Authorized Project License is **\$1,850** plus **\$370** for annual toll free support & maintenance.

Authorized Web User License: Allow a user who has the rights to be in the Lynx Web Application to acquire, annotate, file, and/or edit images in an Authorized Project directly through the Internet or by the use of the Quick Web Acquire Tool. The cost for an Authorized Web User License is **\$250** plus **\$75** a year for annual support & maintenance.

****NEW: Quick Web Acquire Tool:** The Quick Web Acquire Tool will allow you to connect through the Internet to annotate, compress and upload your photos from the jobsite to the corporate database in just two mouse clicks! Send in ten minutes the same photos that now take you four, or more, hours. (Connects to Corporate/Office database) *This tool is included with the cost of the LYNX Web Users or the LYNX Application User Licenses.*

LYNX LPS License (LYNX Light Version): This license can only be bought with the purchase of the LYNX Web Application. Install on to a web server to administer, manage and maintain the LYNX Web Application. The LPS Version includes one concurrent user license and one project for the local database. This license is considered your "main warehouse" to secure your digital photos into one secure, 256 bit encrypted database. *Please note that this version has a 4 gig space limit.* The cost for the LPS License is **\$1,500** plus **\$300** a year for annual support and upgrades. The cost to add Authorized Projects to the Web Application with the LPS License is **\$750** per Project plus **\$150** for annual toll free support and maintenance and each Authorized User License to the Web Application is **\$250** plus **\$75** a year for annual support and upgrades.
